Y6 SRE information

Friday 28th June

Dear Parents/Carers,

Y6 Science Sexual Reproduction Lesson

This will take place on Friday 12th July. We would like to give you the option viewing the material that we use to support the lessons. This will support any conversations that you may wish to have at home.

The lessons will focus on the changes children will go through during puberty. Elements of the sessions will approach this from a scientific perspective: correct anatomical language linked to changes during a human's lifecycle. In addition to this, an element of the session will explain 'how babies are made'. This is age appropriate and taught only to the year 6 children.

The resources that we use combine age appropriate animations alongside more scientific anatomical presentations. During the sessions, questions are encouraged and children are directed towards 'question boxes' in the classroom if they have questions after the session.

If you would like to view the material before the sessions are delivered on Friday 12th July, please email school with a request and we will reply with the resources attached.

Thank you for your continued support.

Kind Regards

The Y5/6 Team
