

Welcome to your Healthy Child Service

Now your child is at school.

The Reception year is crucial for establishing a good foundation for learning. Many parents report that starting school causes an increase in their child's sleep requirements and for some a regression in behaviour. Good routines, regular bedtime and a healthy diet will all help to keep your child healthy and able to cope with these changes.

Health Screening at School Entry ;

We offer the below universal screening programme;

National Child Measurement programme (NCMP); In Reception your child will be measured as part of the NCMP. This is carried out the term of their 5th birthday.

Children who take part will be measured fully clothed except for their coats and shoes. The information is recorded on the NCMP database and is anonymous so your child is not identified.

Hearing Screening; Minor hearing problems are fairly common in children and are important to detect and treat early as this may affect speech development or progress in school. If any follow up tests are required the Audiology team at York Teaching Hospital will contact you. If you have any concerns about your child's hearing at any time please contact the Healthy Child Team.

Vision Screening; Routine screening of vision is carried out, if there are any concerns a referral will be made to the Optometrist at York Teaching Hospital. Eye tests are free on the NHS for children and young people in full time education.

If you do not wish your child to have any of these routine screenings then please contact us within 2 weeks of receipt of this letter.

Medication in School; Schools have their own procedures for administering medicines. If your child needs to take medication during the school day, you will need to discuss this with their teacher.

Medical Conditions; It is important that school are aware of any medical conditions, including allergies your child has and that medication is available in school if required, e.g. asthma inhaler, adrenaline auto-injector etc.

Referring in to our service;

Please contact us if you would like to discuss any issues about your child's health this can be direct via email or telephone as below or alternatively this can be done through your child's school.
